

YASHODHAN SUSHIL KULKARNI

Pune, India · 7410105407 · kulkarnis.yashodhan@gmail.com · linkedin.com/in/yashodhan-k-55ab15229

OBJECTIVE

Motivated Computer Science undergraduate with proven experience building AI-powered applications and engineering control systems for national-level robotics. Eager to contribute technically and grow through real-world challenges.

EDUCATION

PES Modern College of Engineering, Pune

Bachelor of Engineering – Computer Science

Expected: Aug 2028

TECHNICAL SKILLS

Languages: C, C++, Python, SQL, JavaScript, TypeScript

Frameworks & Tools: Node.js, Express.js, React, Tailwind CSS, Git/GitHub, SQLite, Oracle SQL Developer

AI & APIs: Google Gemini API, Gmail API, Google Calendar API, NLP, Prompt Engineering, Stable Diffusion

Hardware & Embedded: ESP32, Microcontrollers, PCB Design, Embedded C, 3D Printing, Onshape CAD

OS & Infrastructure: Ubuntu Linux, Windows, Ultimaker Cura

PROJECTS

Node Sync – AI Email Management Platform

Mar 2026 – Present

Full-Stack Developer | Team NPC Energy | Hackathon Project

- Built a full-stack AI-powered email coordination app using Node.js, Express, React, TypeScript, and Tailwind CSS.
- Integrated Google Gemini API for NLP-driven email summarisation and smart reply generation; connected Gmail API and Google Calendar API for automated inbox and scheduling workflows.
- Designed backend architecture with SQLite and OAuth2 authentication; optimised data parsing for high-volume email processing.
- Led product conceptualisation, branding, and UI design — transitioning a raw prototype into a complete service model within hackathon constraints.

Vulcan Robotics – DD Robocon 2025

Sept 2024 – Present

Technical Team Member & Electronics Planner | National-Level Competition

- Represent the institution nationally in DD Robocon 2025, specialising in hardware-software integration for competitive robotics.
- Engineered control systems using custom PCB design and microcontroller programming in C for optimised speed and accuracy.
- Led 3D manufacturing pipeline using Onshape CAD and Ultimaker Cura for rapid prototyping of mechanical components.

EXPERIENCE

Founder | Director Universe

Jun 2024 – Present

- Founded a digital management agency; designed and implemented automated backend workflows to optimise operations for a roster of content creators.
- Led B2B outreach and partnership negotiations, securing brand collaborations between digital creators and corporate clients.

IT Support Technician | Analyser News

Oct 2019 – Present

- Managed cross-platform IT infrastructure (Windows & Linux), ensuring uptime for daily broadcast operations.
- Administered and delivered rapid hardware diagnostics to resolve networking and system bottlenecks.

CERTIFICATION & COURSES

- Getting Started with Artificial Intelligence · IBM & Modern College Of Engineering
- Journey to Cloud: Envisioning Your Solution · IBM & Modern College Of Engineering
- Lab: Retrieval Augmented Generation with LangChain · IBM & Modern College Of Engineering
- Prompt Engineering · IIT Bombay
- Android Arena workshop · App Club
- Introduction of C++ · Simplilearn(Coursera)
